

On behalf of the entire Barcelona Scoliosis Physical Therapy School, we extend our deepest and heartfelt condolences to the family and friends of Christa Lehnert-Schroth on her passing on March 24, 2015. We all have the deepest gratitude and respect for Christa for her tremendous contributions to the field of scoliosis, as she continued to carry out the vision started by her mother, Katharina.

We are especially grateful for the book written by Christa: "Three Dimensional Treatment for Scoliosis – A Physiotherapeutic Method for Deformities of the Spine". This book has been an inspiration and reference to many families and professionals in their journeys to seek improved quality of life for those with scoliosis.

From the book jacket: "As a physiotherapist., the author worked for 50 years with scoliosis pateints, applying and further developing her mother's innovative, conservative techniques with great success. From 1961 until her retirement in 1995, Christa Lehnert-Schroth served as director of the private Katharina Schroth Klinik in Bad Sobernheim Germany, assisted by physicians, physiotherapists, and other medical professionals. She presented her mother's scoliosis treatment method in many lectures, articles, seminars, and films for physiotherapists and medical doctors, as well as recorded discs for patient home training."

Our condolences especially to Dr. Hans Rudolph Weiss, Christa's son.

As we all continue our professional endeavors in the field of scoliosis, let us all remember and pay tribute to Christa.

With kind regards,

The Instructors of Barcelona Scoliosis Physical Therapy School
